

Progress tracking  
survey for  
commitments  
registered in the  
Nutrition  
Accountability  
Framework

2026

## Introduction

Given the significant reductions in humanitarian and development funding since the 2024 commitment progress tracking survey, the Global Nutrition Report (GNR) would like to understand the impacts on your nutrition work including your commitments.

This document outlines the questions that you will be asked when you share about those impacts as well as report the progress on your commitment(s) registered in the Nutrition Accountability Framework (NAF). It will help you to prepare your responses before you complete the online survey form. If you have more than one commitment, you will repeat the form for each commitment.

You may notice in this document some instructional text (for example, directions to skip certain questions) that does not appear in the online form. These instructions are included here for reference only; the online form will automatically guide you through the survey and skip questions where appropriate. You may also notice that this document includes both section 4 (for indicators that **have not** been assessed) and section 5 (for indicators that **have** been assessed) are included. This will allow you to prepare to answer whichever section is relevant. As you complete the online form, either section 4 or section 5 will appear, not both.

Please note that this document is for informational purposes only. To report progress, you need to complete the online survey form accessible from 'Your NAF commitment(s)' after you sign into the NAF at <https://naf.globalnutritionreport.org/signin>.

Please contact [naf@globalnutritionreport.org](mailto:naf@globalnutritionreport.org) with any questions relating to reporting progress on your commitments.

## 2. Impact of reductions in humanitarian and development funding

*Humanitarian and development funding has been significantly reduced in recent years, affecting health, agriculture, social protection and other nutrition-related actions worldwide. We want to understand how these changes have impacted your commitment and any strategies you have used to adapt. Your responses will help identify common challenges and opportunities across the sector.*

**\* Q2.1. Has your commitment been affected by reductions in humanitarian and development funding in the past 12 months? (Select only one.)**

- Yes (go to Q2.2)
- No (go to Q2.8)
- Unsure/prefer not to say/not relevant (go to Q2.8)

**\* Q2.2. Were all commitment-related activities terminated? (Select only one.)**

*Termination means that all activities fully stopped. If some activities continued at a reduced level, please answer 'No'.*

- Yes (go to Q2.4)
- No (go to Q2.3)

**\* Q2.3. Were at least some of your commitment-related activities reduced? (Select only one.)**

- Yes (go to Q2.4)
- No (go to Q2.7)

**\* Q2.4. When your commitment-related activities were terminated or reduced, did you take any steps to mitigate or adapt to these effects (e.g. pursue alternative financial support or delay implementation)? (Select only one.)**

- Yes (go to Q2.5a)
- No (go to Q2.6)

**\* Q2.5a. What steps did you take to mitigate or adapt to the effects? (Select all that apply.)**

### **Financial resources**

- Pursued alternative financial support – Sought new donors, grants or other financial support to replace lost funding
- Reallocated financial resources – Redirected existing funds, including for staff or infrastructure to sustain nutrition commitments

---

### Scope and timing

- Reduced scope of work – Planned activities scaled back or limited compared to the original plan
- Reduced geographic coverage – Activities restricted to fewer regions or populations than intended
- Adjusted timing – Extended or compressed timelines for planned actions or milestones to accommodate resource constraints
- Reduced quality of implementation – Continued activities at lower standards
- Shifted priorities – Redirected efforts to other urgent areas or high-impact activities

### Staffing and expertise

- Adjusted staffing or technical capacity – Reorganised teams, reduced staff or engaged consultants to maintain delivery

### Partnerships and collaborations

- Established new partnerships or collaborations – Formed alliances with other organisations to share resources or expertise

### Monitoring and reporting

- Adjusted scope and frequency of data collection – Streamlined monitoring by reducing the number of indicators tracked, limiting data collection to essential metrics or shifting from continuous to periodic reporting to conserve resources
- Established or located alternate data sources – Identified new or substitute sources of information to maintain reporting when original sources became unavailable
  
- None of the above
- Other (go to Q2.5b)

**\* Q2.5b. (If you selected 'Other' in Q2.5a) Please specify the 'other' step you took to mitigate or adapt to the effects.**

---

---

The next question will ask you about the impacts of the following dimensions on progress towards this commitment:

- *Scope of work* – Activities reduced or terminated.
- *Geographic coverage* – Coverage limited to fewer regions or populations.

- *Timelines* – Activities delayed or timelines condensed.
- *Quality of Implementation* – Continued activities, but at lower standards of quality.
- *Priorities* – Redirected efforts to other urgent areas or high-impact activities.
- *Staffing and expertise* – Personnel or technical capacity diminished.
- *Partnerships/collaborations* – Partnerships ended or new collaborations stalled.
- *Monitoring and reporting* – Data collection (including external data collection, such as DHS) scaled back or discontinued.

\* Q2.6. Please indicate the level of impact that reductions in humanitarian and development funding have had on each of the following dimensions of the activities that contribute to your commitment. If you shared above any mitigation steps, please report the impact that remains after mitigation. (Select only one rating per dimension.)

### 3. State of assessment for commitment

\* Q3.1. Have you measured the key indicator (*as listed in section 1 of the online form*) since baseline or (if you submitted progress to the GNR in 2024) since the last round of commitment progress tracking? (Select only one.)

- Yes (go to section 5)
- No (go to section 4)

## 4. Reasons for not assessing the key indicator for commitment

\* Q4.1. Why has the key indicator not been assessed since baseline or since the last reporting round? (Select all that apply.)

- Data has not been collected – No new data gathered or shared since baseline or last reporting round
- Data was collected but has not been processed – Data exists but is pending analysis or validation since baseline or the last reporting round

## 5. Latest level or status of the key indicator

Please report the most recent level or status of your key indicator. Please ensure that the unit of the latest level or status is the same as your baseline and target level or status listed below. For example, if the unit for your baseline and target levels are percentages (%), then your latest level should also be reported as a percentage.

If the key indicator captures an action (e.g. 'Establishment of a national nutrition committee', 'Implementation of previously established policy on food supply chain'), the updated value should report whether the action was carried out (yes/no).

Please note that you will only receive one of the questions in Q5.1 depending on your original key indicator.

Key indicator: [auto filled with key indicator]

Baseline value: [auto filled with baseline value and unit]

Target: [auto filled with target value and unit]
